Attention Lumber Dealers: It's Time to Mark Your Calendar

All roads in February lead to your State Lumber Association Convention.

Make plans now to attend the lumber association convention in your state. Join your friends in the industry and take a look at the latest in new products and services. It's the most convenient way to be exposed to the latest in products and ideas, helping you do your job even better! Besides the activity on the show floor, each convention has seminars conducted by industry experts that are aimed at helping you "fine tune" specific skills. In addition to the exposure to the latest in new products and services, there is the chance to renew acquaintances with friends and suppliers to the industry. Renew old friendships and begin new ones while at your lumber association convention!

In May of 2007, Cascade Mfg Co started an affiliate company: *Infrastructure Technology Solutions* provides technology consulting, disaster recovery planning, online data backup, as well as web design and hosting services. Stop by our booth to discuss technology opportunities for your business.

Together, let's make things great in 2008!
