

One Call Will Do It All

Good Morning,

Today's construction projects are challenging. Home buyers are more discriminating, contractors have shorter deadlines, and there's always the element of weather. You need to rely on one source to provide the products and services that cover all the elements of your job; because the last thing you need is a *snafu* on your project.

At Cascade Mfg Co *your* satisfied customer is *our* goal. That is why we incorporate a **Total Support™** process to your engineered wood and truss component projects.

Consider these products and services:

- *Knowledgeable and capable field support in your office or at your jobsite.* Our sales representatives are equipped to provide what you need in the way of bids, value-added design assistance, or technical support in the field.
- *Comprehensive and easy-to-read framing plans.* We utilize the latest in computer-aided design/layout software and provide 3-D views to assist in the framing process.
- *Serving you from **three** locations.* All our production facilities have computer-aided sawing and assembly equipment. The result is consistency in product quality. Your contractor can tell the difference! Large chord trusses such as girders or room-in-attic trusses are uniform and straight! Our trusses are identical and plum. We are the only Iowa truss company that is WTCA QCII™ certified, and who participates in a third party inspection process.
- *Innovation in new product design such as the Quik Frame™ and Hip and Valley™ trusses just to name a few.* We provide "contractor friendly" products to make installation easier for your customer.
- *Inside Sales at your service!* If you have a question or a problem our Inside Sales support team is available when you need them. They offer fast, friendly, and courteous answers to your questions.
- *An extensive line of Trus Joist™ engineered wood products.* Not just I-Joist or LVL. How about LSL products such as headers, studs, 45 degree studs, engineered tall wall design, rim board and stair stringers? The best products with the best warranty in the business!
- *Space Joist® TE.™* A product that offers the benefit of a wood I-Joist with an open web design. What could be easier?
- *Finally, a full range of Simpson Strong-Tie™ connectors are available for all of your projects.*

Call us today. We are the one call to handle all your component needs.
