

Got Questions About Bluwood®? We Have Answers!

We have received calls about Bluwood®, your source of wood protection from moisture, mold and termites. We would like to answer some of the more frequently asked questions.

What is Bluwood®?

Bluwood® is the name given to wood framing with a two-part coating technology called the Perfect Barrier System. The first part of this technology is an Infusion-Film that interlocks with wood fibers to provide controlled topical and subsurface moisture absorption. The Infusion-Film is specially formulated to resist mold fungus growth on the cured film.

The second part of this technology is Perfect Barrier DOT Wood preservative, a proven fungicide and insecticide that provides protection from rot fungi and wood ingesting insects including termites.

How is Bluwood® different?

Bluwood® utilizes a unique anti-microbial, moisture, fungal and pesticide protection that is chemically attached to cellulose, offering protection during the construction process and protection for the homeowner from unforeseen moisture/water problems after the project is completed.

Where is Bluwood® used?

Bluwood® can be used for all of the wood framing components used in a covered structure: the roof, floor and walls. In addition it is also approved for plywood or OSB roof and floor panel products.

Does this system have any effect on the structural properties of wood?

No, there are no adverse changes in the structural properties of wood when coated with Bluwood®.

Can Bluwood® be applied to pressure treated wood?

Yes, Bluwood® applied to water borne preservative treated wood will provide the same benefits of protection with no negative effects.

Are there environmental or regulatory concerns with the use or disposal of Bluwood® coated material?

Bluwood® can be recycled and has the same disposal requirements as non-treated wood. There are no Volatile Organic Compounds (VOCs) that can be released into the environment and it is non-hazardous, non-polluting and non-carcinogenic per the limits in the Federal Insecticide, Fungicide and Rodenticide Act.

With Bluwood® you can manage the risk and liability against mold and mildew. Call us today with your questions or to request a Frequently Asked Questions fact sheet or a Specification Guide.
